Installation

8. Installation

To install the Gigabit PoE Injector, please follow the steps below.

8.1 Connect the DATA IN port on the Gigabit PoE Injector to a switch or HUB with an RJ-45 cable.

8.2 Using an RJ-45 cable, connect the DATA OUT port on the Gigabit PoE Injector to a PoE splitter, PoE device (such as a router, access Point, etc.) or a PoE Hub.

8.3 Plug in the power connector of the Injector to a connect dc power outlet.

8.4 The product fixed installation, please refer to the figure 1.

8.5 Before starting, ensure all connections are correct.

- The Gigabit PoE Injector connects to the Splitter, PoE Hub or POE device through the DATA OUT port.
- The Gigabit PoE Injector connects to the switch through the DATA IN port.
- The POWER IN port is receiving power from the dc power outlet.

Start connecting the operating voltage solely if all the above requirements are fulfilled.
